It is refreshing working with Image Solutions because they do everything that they tell us they will do. That seems to be a rare feature in today's world that a business can be trusted to follow through on their word. When we were shopping for a copier and a document management program Image Solutions was the only company we found that could put it all together locally. They didn't have to go to Charlotte, Greenville, or Greensboro to bring in the technical staff to help with the document management installation. Any questions or concerns have been handled on a local level with local support, most times we get a visit in a few hours. The one thing that stands out most in my mind is when we were shopping around for copiers and document management programming and talking to all the companies in the area, Garrett said to us: "How many other companies have an owner out here talking to us?". It was true no other company had that kind of local connection.

Thanks for all that you do for us.
